

## Season 1 Episode 4

## The Green Vile

Important scientists are in a lab and they crowd around a cylindrical machine with green veins. They insert more types of green liquids into the veins of the cylinder. The lead scientist stands at the center of the crowd and he said, "This is it. The moment of truth. We have finally created a gelatinous being that may cure every form of disease there is. The plasma this thing is made of could make us a large fortune indeed." One of the scientists looks at a computer that has smoke blowing off it and it is making dingy sounds. The scientist said, "Morok, we are getting pressure complications." Morok pushes off the scientist and he looks at the computer and he taps it. The computer breaks and the plasma is extruded from the cylinder and it forms the shape of a green plasma man. One of the scientists said, "Is this it? Is this what our years of work has come to?" Morok walks up to the plasma man and he said, "Hello. I am your creator I..." The plasma man extends its tongue and it absorbs the scientist. The plasma man engulfs all the other scientists in the room. He then grows into a giant and he destroys the roof of the lab and he steps out and he destroys parts of the Ultraverse city.

Ivan, Dirk, and Safron gather around with groups of other monks and they crowd around the monk pilot instructor. The instructor said, "I know most of you have not had much flight practice yet but you have no time to practice. All of you are needed now to combat the green man that is attacking the city." The instructor shows the monks footage of the plasma man being a giant and destroying the city. The instructor said, "If any of you happen to be related to this man then I may ask you to tell us what you know about him." All the monks look at one of the monks that happens to look like the plasma man. The instructor said, "You have something to say?" The plasma monk said, "I am from the universe V-48 which is known by most as the Jelly Plasma Universe." The instructor said, "Sure thing. You are now off to your fighters. May the farce be with us... oh wait, it is not parody day today. I think that's next week."

Ivan, Dirk, and Safron jump in their fighters. They head out of the hangar and they fly over the city. The Monk Flight Leader turns on the communicator and he said, "All monks report in." One of the monks said, "Monk One, standing by." "Monk Two standing by." "Monk three standing by." Ivan looks at the cockpit dashboard and he finds his designation. When it came to him, Ivan said, "Monk Seventy-Two standing by." The flight leader said, "Alright, we are going in." The flight leader hovers close to the plasma monster and he fires some rounds on the monster. The monster sticks his arms out and the flight leader barely escapes and the monster destroys a few of the monk fighters and he absorbs the monks with his arms. The flight leader said, "That thing is too strong for our regular fire power. We need something more. We may be able to trip him. Follow me." Some of the monk pilots fly next to the flight leader and he flies right in front of the plasma man. The flight leader said, "On my mark... Now!" They fire thick black metal ropes from their fighters and they stick in the gaps between corresponding buildings across the street. The ropes form a wall and the monks fly away. The plasma man walks into the ropes and he gets cut up into small pieces and he splashes all over the ground.

Some people are sitting at a patio and they have coffee and food and then they get drenched in green plasma. People in the streets clap and cheer. Ivan is in his fighter and he said, "I guess that worked well for everyone." Dirk said, "Looks like we weren't even needed. How lame." Safron said, "Something tells me he is going to give us more of a fight." The green plasma remains in the street form back together and they form back into the plasma man. He grows larger and he swipes down several monk fighters and he absorbs the monks. The flight leader said, "It looks like my plan didn't work after all." The plasma man grabs onto the flight leader's fighter and the flight leader ejects and he parachutes away. The plasma man grabs onto the flight leader and he gets absorbed. Monk Two looks at this and he said, "Our leader is down. That puts me in charge." Monk Two's fighter gets destroyed and Monk Two gets absorbed. Monk Three said, "I guess that puts me in charge." Monk Three gets destroyed and absorbed.

The monks in fighters keep trying pointless things to take down the plasma man but they keep getting destroyed and absorbed. Safron said, "Ivan, do you have anything?" Ivan thinks and he said, "I think I have an idea. We need someone on the ground to find out where this thing came from and study it and find a weakness." Safron said, "That sounds good but, where are we going to land? The streets are filled with debris and scared people." Ivan said, "Who do we know is currently on the ground?"

Keith jumps out of a portal and he ends up on the city street in the midst of the carnage. Keith said, "I must have been gone too long. It looks like I can't leave this place for a nanosecond without something happening." Keith's communicator watch chimes. Keith goes to it and Ivan is on the communicator. Ivan said, "Keith, there is a giant monster made out of a green plasma and he is attacking and destroying the city. We don't know what his inner intentions are nor do we know what his weakness is. We are in the air and have nowhere safe to land without getting absorbed by the monster. We need you to find out this thing's weakness." Keith said, "Another opportunity for me to play the hero. Sounds like a challenge."

Keith goes to Roswell's house and he knocks and opens up the door and enters. Keith said, "Roswell? Where are you?" Keith walks around Roswell's house and he enters Roswell's room. Keith sees Roswell the blue macaw is on his perch and he is upside down with his eyes closed. Keith's eyes go big and he runs for Roswell. Keith grabs Roswell and he brings him down towards him. Keith feels around Roswell. Keith said, "It looks like Roswell is dead. I guess I am left having to deal with this myself." Keith wraps up Roswell's body and he heads outside with it. The monster is there and it grabs a power tower and it throws it at Keith and it misses. Keith runs for a pickup truck and he throws Roswell's body in the back and Keith starts up the pickup truck and he speeds down the ruined streets. Keith navigates around all the people and he speeds down the road. Keith sees the plasma man is on his hot on his tail. Keith goes to his communicator and Keith said, "Ivan, the monster is onto me. I need you to lure him off." Ivan said, "Got it." Ivan signals for his friends to form up on him. Ivan and his friends hover around the monster and they fire volleys of missiles and other shots at the monster. The plasma man loses his focus on Keith and he goes to fight Ivan and his friends. Ivan does some fancy flying and he tricks the plasma man into twisting and ties his arms together. The plasma man tries to untie his arms but he can't. He screams and yells. Safron said, "Great work, Ivan. You made him tie up his own arms." Dirk said, "Who would have guessed that such a simple thing would defeat him." Dirk hovers around

the plasma man and he said, "Hey plasma man, you want me but you can't since your arms are tied. Ha ha ha!" The plasma man uses his tongue and he destroys Dirk's fighter and he absorbs Dirk. Safron said, "Well, it looks like we are down another ally. Got any more plans, Ivan?" Ivan said, "It looks like there are only two of us left. The entire Ultraverse of Universes is dependent on us." Ivan starts panicking. Safron said, "If anyone can stop this thing, it is my Ivan." Ivan said, "I guess you are right."

Keith drives down the street and he comes across a residue of the plasma from when it got cut up in the ropes. Keith takes a sample of the stuff and he places it into his watch. Keith's watch reveals a map showing where Keith is and where the origin of the plasma is. Keith drives off for the origin.

Keith arrives at the lab and he sees the roof is missing. Keith walks through the front door and he sees there is no one there. Keith said, "Something isn't right here. Why would someone leave a lab completely empty of people at a time like this?" Security robots are activated and they aim and attack, Keith. Keith takes out his Cyan Sword of Redemption and he slices one of the security bots in half and he stabs another one in the chest. One of them fires a rapid volley of shots and Keith deflects them with his sword. Keith slowly walks up to the large rapid-fire gun as he is deflecting its shots and Keith cuts the tip of the gun off and Keith stabs the thing with his sword and it explodes. Keith goes into the room the cylinder was in that made the plasma man. Keith sees the destroyed cylinder with remains of the green plasma on it. Keith turns around and he sees a screen with the lab's logo on it. Keith sees it's a touch screen and he touches it. He is given a list of options. Keith presses, the option titled, "About Our Project." A video appears on the screen of Morok. Morok said, "Hello, I am Dr. Morok of the Ultraverse Lab project. For nearly ten years now, my team has been figuring out ways to cure diseases and sicknesses in all the universes of this vast Ultraverse. We figured the only way to cure them is to make a substance that can become humanlike. We had to create a new form of life to use as a test subject for our vaccines and antidotes. Our current project is a test subject we will use to test antidote Beeta Serum Seven. It will cure cancer if it goes through." The image cuts to the cylinder with green veins having the possible cancer cure placed into the veins. The cylinder erupts into the green plasma man and it absorbs the people in the lab. Keith said, "This madness needs to stop. Their goal was ludicrous. No one can possibly cure any form of sickness for good. It looks like they got their just deserts." Keith finds a sheet of schematics for the substance used. It shows how to make the formula. Keith sees a part that says, "The plasma compound is composed of the four substances. To terminate the compound, all the components of the substance need to be separated." Keith said, "I think I'm on to something. Now we just need to invent a way to separate all the substances of the compound. I think we can do that. I wonder how well Ivan is holding up."

Ivan is flying over the city and he is struggling every second to outmaneuver the plasma man. Keith drives the pickup truck down the street and he gets by easy because Ivan still has the plasma man focused on him. Keith drives to the main capital building that is encased in a giant dome-like shield. Keith stops at the gate and he said, "This is Keith. I have something that can be used to stop this monster and restore order and peace to the Ultraverse."

Keith enters the senate and all the senators look at him. Keith shows them the plans and the part that states to destroy the compound by separating all the substance

components. Keith said, "We need to build something that can be used to separate all the components of the plasma man." The lead senator said, "How are we going to do all that? It is not like machines of those sorts just grow on trees." One of the senators said, "Actually, I have been working on a rocket launcher that has the same impact of an Atom Smasher and Atom Smashers are made to separate components of atoms. I am sure I can use this on the plasma man." Keith said, "Where is this, rocket launcher of yours?" The senator said, "I have it in my apartment and we need to launch it from a high altitude. I would say a place like the top of a roof." Keith said, "That sounds good. We need to go there. I will drive."

Keith and the senator go inside an apartment building and Keith is holding onto Roswell's body. The old landlady comes out and she said, "Kieran! You still haven't paid your rent yet! I will have to evict you and have you left to the monster." The wall behind the landlady breaks and the plasma man grabs onto her and absorbs her. Keith and Kieran run for the unit and the plasma man breaks more of the walls. Keith and Kieran bring out the rocket launcher and they bring it up a set of stairs that leads to the roof. Keith places Roswell's body down on the roof and they set up the rocket launcher.

The rocket launcher is almost set up and the plasma man sees them and he throws his tied up arms to the roof and Keith jumps out of the way. Keith takes out his sword and he cuts the tied arms off. The monster shoots his tongue towards Keith and Keith jumps over again and dodges it. Kieran said, "I am almost ready. This will..." The plasma man's tongue sticks to Kieran and he gets absorbed into the plasma man. Keith heads for the rocket launcher and he programs the coordinates and he sees it is prepped and ready to fire. Keith aims the launcher at the plasma man and he is about to fire and Ivan and Safron's fighters get in the way. The plasma man uses his tongue to destroy Safron's fighter and he absorbs her. Ivan yells, "NOOOO!" Keith said, "That does it. Go to..." The plasma man shoots his tongue and it hits an object on another roof and it bounces off and it sticks to Keith and Keith is pulled into the plasma man. Ivan said, "Keith was our last hope. I guess I am all there is left now. There is only one thing I can do." Ivan spots the rocket launcher and he jumps out of his fighter and he lands on the roof and he hits the fire button on the rocket launcher and it is launched at the plasma man. The plasma man moves and misses the rocket completely and he uses his tongue and he absorbs Ivan.

The plasma man stands over the ruined streets of the city and he laughs. He laughs at all the carnage and destruction he has caused. Mystika peeks from behind a mailbox and Mystika said, "This is how the story ends. They always make it look like the antagonist has won the conflict but the real ending happens if you look closer." Roswell's body is on the roof next to the launcher and Roswell jumps and he uses his beak to cut open the wrapping he was in and he sees the rocket launcher is still loaded with the substance. Roswell jumps and flaps his wings and he flies over the launcher base and he grabs onto it with his feet and he flies over the plasma man. Roswell releases the launcher base into the plasma man and it sinks into his plasma. The plasma man decomposes into several balls of different substances until there is nothing left of him. Everyone that was absorbed into him is poured out onto the street. Ivan gets up and he said, "What happened? Are we in Dizzy-Land?" Dirk said, "This is worse than that 5D movie I went to." Safron sees Ivan and she hugs Ivan and she said, "Ivan! I'm glad you are alright." Keith gets up and brushes himself off. Roswell lands in front of Keith. Keith said, "Roswell? I thought you were dead." Roswell said, "I saw that monster attacking the Ultraverse and making its way through our strongest forces. I figured I had no way of defeating this monster so I pretended to be dead so it would not absorb me. I guess

my plan worked, didn't it." Keith said, "I guess it did." Kieran said, "Did my launcher machine work?" Keith said, "I say it did."

Mystika walks out in the carnage in front of the people that were absorbed by the plasma man that are now on the street. Mystika said, "This is the ending that everyone ultimately expects. Remember, whenever all hope seems lost, there is always something that can happen that will make the outcome good in the end." The camera man gives a stern look to Mystika. Mystika said, "I guess this concludes my documentary." The camera man said, "If you could call this a documentary since all you did was say a few lines. I can show what would actually make this more entertaining." The camera man shows all the people in the streets the footage of Mystika sucking his thumb in fear and panicking and Mystika yells, "This is how the Ultraverse ends!" Mystika said, "I was just acting for dramatic purposes." Dirk said, "Sure you were."
